-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 52-54 and 57 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 52-54 and 57 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☐ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 11/2006.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application
- ☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6 November 2006 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 52-54 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-72128 (hereinafter '128). '128 discloses an oral brush comprising an elongated handle (3) head portion (1) as well as a brush portion comprising at least one elastomeric element (2) comprising a styrenic block copolymer (see page 6 of exhibit "B" filed 4 October 2004) thermoplastic elastomer and further including a plurality of conventional non-elastomeric bristles in a center portion of the head (see page 5, line 28 thru page 6, line 4 of the translation attached to '128) with the elastomeric bristles/elements being at the side portions of the brush portion (claim 3). '128 discloses the invention substantially as claimed with the exception of the Shore A

Art Unit: 1744

hardness being "less than 55". The example given in the specification for the preferred material in the recited category is a known material (KRATON; page 7, line 1). It is not unreasonable to assume that an elastomer in this class of materials having the recited hardness exists under the trademark KRATON. In addition, the prior art device is also used in the same environment and that one of ordinary skill would well be aware of hardness values that would be appropriate for use in the user's mouth (it's not like the prior art is for an entirely different purpose). It would have been obvious to one having ordinary skill in the art at the time the invention was made to select a KRATON having an appropriate hardness in the recited range, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. With regard to the term "molded", the materials of the present application are also extruded or molded. In addition, the present specification (eg, page 3, lines 21-25) describes the category of materials known as "thermoplastic elastomers" as materials which can be processed by conventional plastics processing methods which are well known in the art, such as extrusion or injection molding.

Response to Arguments

4. Applicant's arguments filed 6 November 2006 have been fully considered but they are not persuasive. The main argument is essentially a repeat of the issues raised in the previous response. That pertained to the term "molded" in describing the elastomeric element(s) recited in claim 52. The examiner reviewed the two documents as requested by application (in the prior response). These documents show that one in

Art Unit: 1744

the art may use different processing methods and parameters to produce a desired property. In addition, the prior art applied against the claims are in the same environment as that of the present invention (an oral brush). It is not like the examiner is merely taking a known material and arbitrarily choosing to use one with properties that would be useful for the intended purpose. The use of an elastomer in an oral brush is taught by the prior art and one of ordinary skill could readily determine which of the known materials of the type suggested by the prior art would be usable in the recited environment. The term "molded" broadly describes a variety of processes used to form plastic (or flowable) materials, including extrusion. Looking to the specification of this application (in particular page 3, lines 4-26), it is stated that the elastomeric elements described therein may be formed "by conventional processing methods which are well known in the art, such as extrusion or injection molding" (page 3, lines 23-25). The same elastomeric element(s) is described as being capable of being formed in any number of ways, including extrusion and injection molding without any suggestion that one process produces a different article or different properties thereof.

Conclusion

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued

Art Unit: 1744

examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Spisich whose telephone number is (571) 272-1278. The examiner can normally be reached on M-Th (5:30-3:00), Alternate Fri off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys Corcoran can be reached on (571) 272-1214. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
